

AXRY 260 - NGX - SBI - PRR50 - H1* - H2* - AC - JXXXX - L120

Construction series

Bore in mm

Bearing type

Lubrication connection:

Without = only on outer ring
SBI = additionally on inner ring

Accuracy requirements:

Without = Standard
PRR50 = Axial and radial runout tolerances restricted
PRR30** = Axial and radial runout tolerances high precision

Connection dimension H1:

(*only for sizes 580 and 650)
Without = Standard
H1 = Restricted connection dimension H1

Connection dimension H2:

(*only for sizes 580 and 650)
Without = Standard
H2 = Restricted connection dimension H2

Bearing alignment:

Without = Standard
AC = Customized alignment

Regulation:

Without = Standard
JXXXX = Customized regulation (number is issued by myonic)

Lubrication:

Without = Standard grease
L120 = Bearing ungreased, only preserved (e.g. for oil lubrication)
GXXX = Special grease (number is issued by myonic)

**available for bore 260-650 mm
